

U-MATIC EDITING SYSTEM MANUAL

SONY®

FROM CUT ONLY EDITING TO A/B ROLL EDITING WITH U-MATICS

Sony can offer a variety of U-matic editing systems, from a CTL based two-machine editing system to an A/B roll editing system with a Dynamic Tracking effect, to satisfy user's needs.

The VO-9850 U-matic adopts the SP (Superior Performance) technology for high picture/sound quality program creation and allows time code based editing with optional time code board. The combination of the VO-9850 U-matic and the RM-450 Editing Control Unit is most suitable for cut editing.

The BVU-900 series VTR provides the optional Plug-in Time Base Corrector, Plug-in Digital Noise Reducer, and Plug-in Time Code Generator/Reader (The Built-in Time Code Reader is supplied to the BVU-900 and BVU-920.) for simple system connection. The BVE-600 Editing Control Unit with optional switcher board can compose simple A/B roll editing system with the BVU-900 series U-matics. The BVE-900 Editing Control Unit offers a sophisticated editing system for high quality program production.

U-MATIC EDITING SYSTEM APPLICATIONS

- A. CTL Based Cut Editing System
- B. Time Code Based Cut Editing System
- C. Time Code Based Cut Editing System with Freeze Picture Effect
- D. Time Code Based Cut Editing System with Dynamic Tracking Effect
- E. Time Code Based Cut Editing System with Freeze Picture and
Dynamic Tracking Effects
- F. Two Player A/B Roll Editing System
- G. Two Player A/B Roll Editing System with Freeze Picture Effect
- H. Two Player A/B Roll Editing System with Dynamic Tracking Effect
- I. Two Player A/B Roll Editing System with Freeze Picture and
Dynamic Tracking Effects
- J. Three Player A/B Roll Editing System
- K. Three Player A/B Roll Editing System with Freeze Picture Effect
- L. Three Player A/B Roll Editing System with Dynamic Tracking Effect
- M. Three Player A/B Roll Editing System with Freeze Picture and
Dynamic Tracking Effects

NOTE

* RCC-5G cable: The RCC-5G cable is supplied with the BVU series U-matics and is not supplied with the VO series U-matics. The required quantity of RCC-5G cables in the equipment list shows total quantity counting both supplied and optional cables.

* BVR-55/55P: Since the BVR-55/55P is supplied with the BKU-901A/903A Plug-in Time Base Corrector, the BVR-55/55P is not written in the equipment list.

A. CTL Based Cut Editing System

(a) SP U-matic editing system

FEATURES

- * Easy and friendly operation via a CTL based editing.
- * Economical SP U-matic editing system for multi-generation dubbing capability.
- * SP, High Band, and Low Band modes playback capability in the PAL system.

Note: In the PAL system, if a Low Band recorded tape is installed into the VO-9850P as a recorder in this editing system, since the VO-9850P does not provide Low band recording mode, the VO-9850P records in High Band or SP mode on the Low Band recorded tape. To avoid this problem, in the editing mode, the recorder side of the VO-9850P does not playback in Low Band mode.

DESCRIPTION	MODEL NAME	QUANTITY

11. Rack Mount Kit for RM-450	RMM-450	1
12. System Rack		1 set

(b) Editing system with VO-5800/VO-9850/RM-440

FEATURES

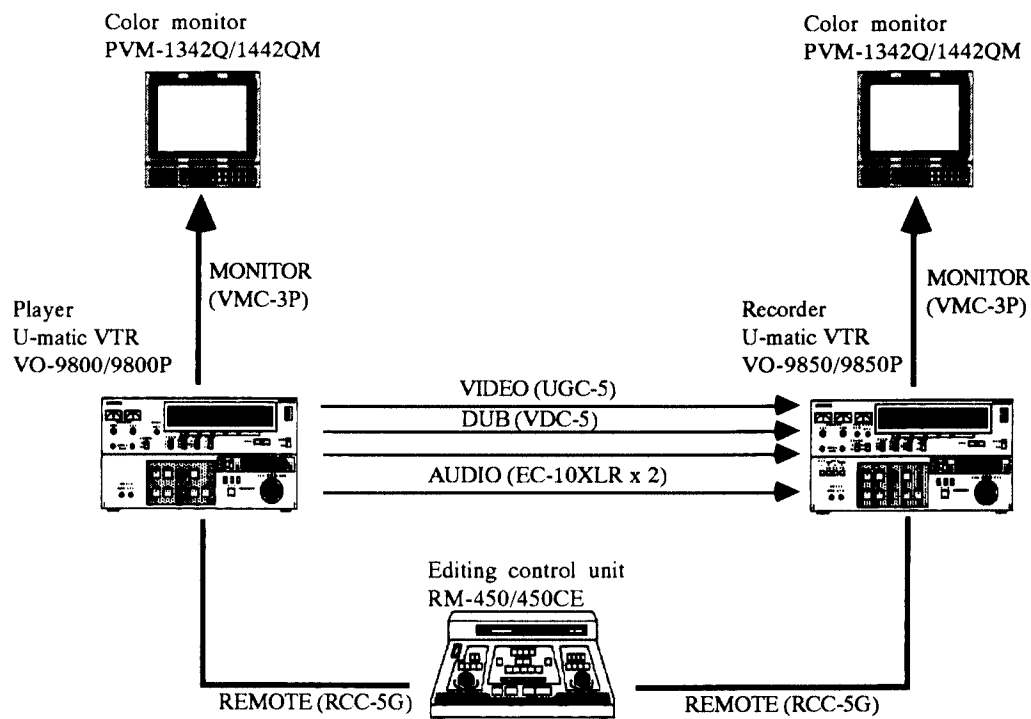

- * The VO-9850/9850P can be added to current U-matic editing system.
- * With the BKU-703 33-pin editing interface board, the VO-9850/9850P can be added to the RM-440 U-matic editing system.

DESCRIPTION	MODEL NAME	QUANTITY

12. Rack Mount Kit for U-matic	RMM-501	2
13. Rack Mount Kit for RM-450	RMM-450	1
14. System Rack		1 set

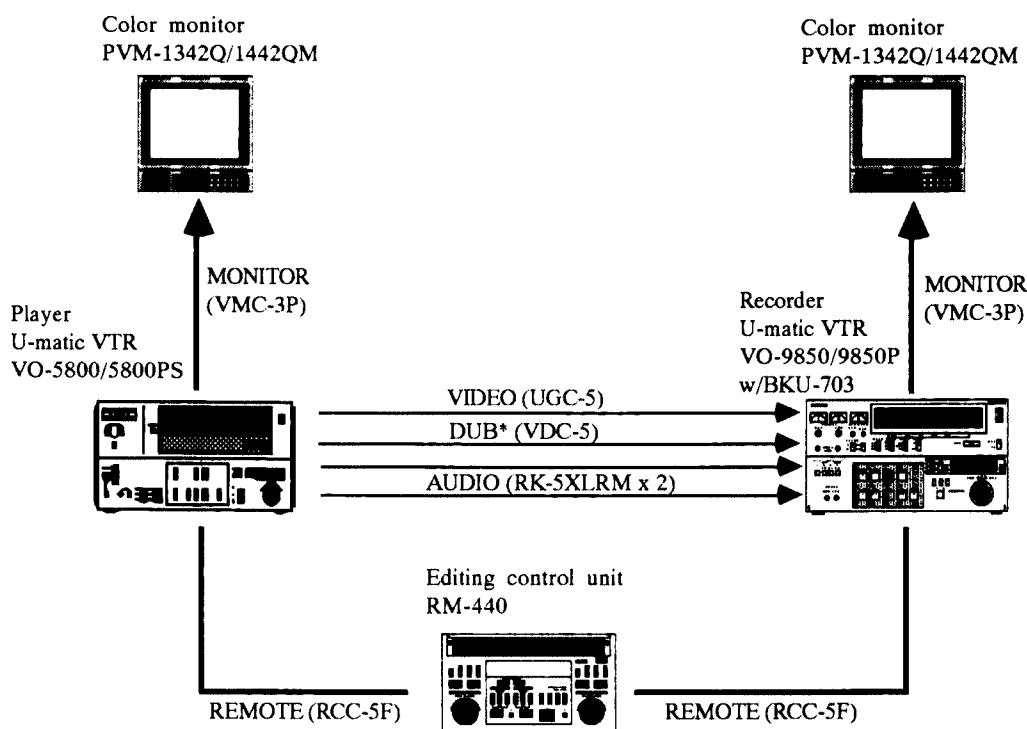

Note: In the PAL system, the dubbing cable cannot be used.

A. CTL Based Cut Editing System

(a) SP U-matic editing system

(b) Editing system with VO-5800/VO-9850/RM-440

*Note: In the PAL system, the DUB cable connection can not be used because the VO-9850P does not provide Low Band recording capability.

B. Time Code Based Cut Editing System

(a) Editing system with the VO-9850 and VO-9800

FEATURES

- * Accurate editing can be executed using time code.
- * Economical SP U-matic editing system for multi-generation dubbing capability.
- * SP, High Band, and Low Band modes playback capability in the PAL system.

Note: In the PAL system, if a Low Band recorded tape is installed into the VO-9850P as a recorder in this editing system, since the VO-9850P does not provide Low band recording mode, the VO-9850P records in High Band or SP mode on the Low Band recorded tape. To avoid this problem, in the editing mode, the recorder side of the VO-9850P does not playback in Low Band mode.

B. Time Code Based Cut Editing System

(a) Editing system with the VO-9850 and VO-9800

(b) Editing system with the BVU-900 series

C. Time Code Based Cut Editing System with Freeze Picture Effect

(a) Editing system with the VO-9850/BVU-900/RM-450

FEATURES

- * Fine freeze picture, provided by the BKU-902/904 Plug-in Digital Noise Reducer can be used for editing.
- * Cut-in Auto Freeze function automatically freezes a picture at editing in-point, which is controlled via the RM-450/450CE CUE signal output.
- * The BKU-902/904 Plug-in Digital Noise Reducer can extract noise effectively and improve the S/N ratio up to 6dB.

C. Time Code Based Cut Editing System with Freeze Picture Effect

(a) Editing system with the VO-9850/BVU-900/RM-450

(b) Editing system with the BVU-900 series

D. Time Code Based Cut Editing System with Dynamic Tracking Effect

FEATURES

- * The BVU-920/920P provides noiseless still, slow, fast, and reverse playback pictures for effective picture creation.
- * Dynamic Tracking Playback speed can be controlled via the RM-450/450CE.

E. Time Code Based Cut Editing System with Freeze Picture and Dynamic Tracking Effects

(a) Editing system with the VO-9850/BVU-920

(b) Editing system with the BVU-950/BVU-920

F. 2 Players A/B Roll Editing System

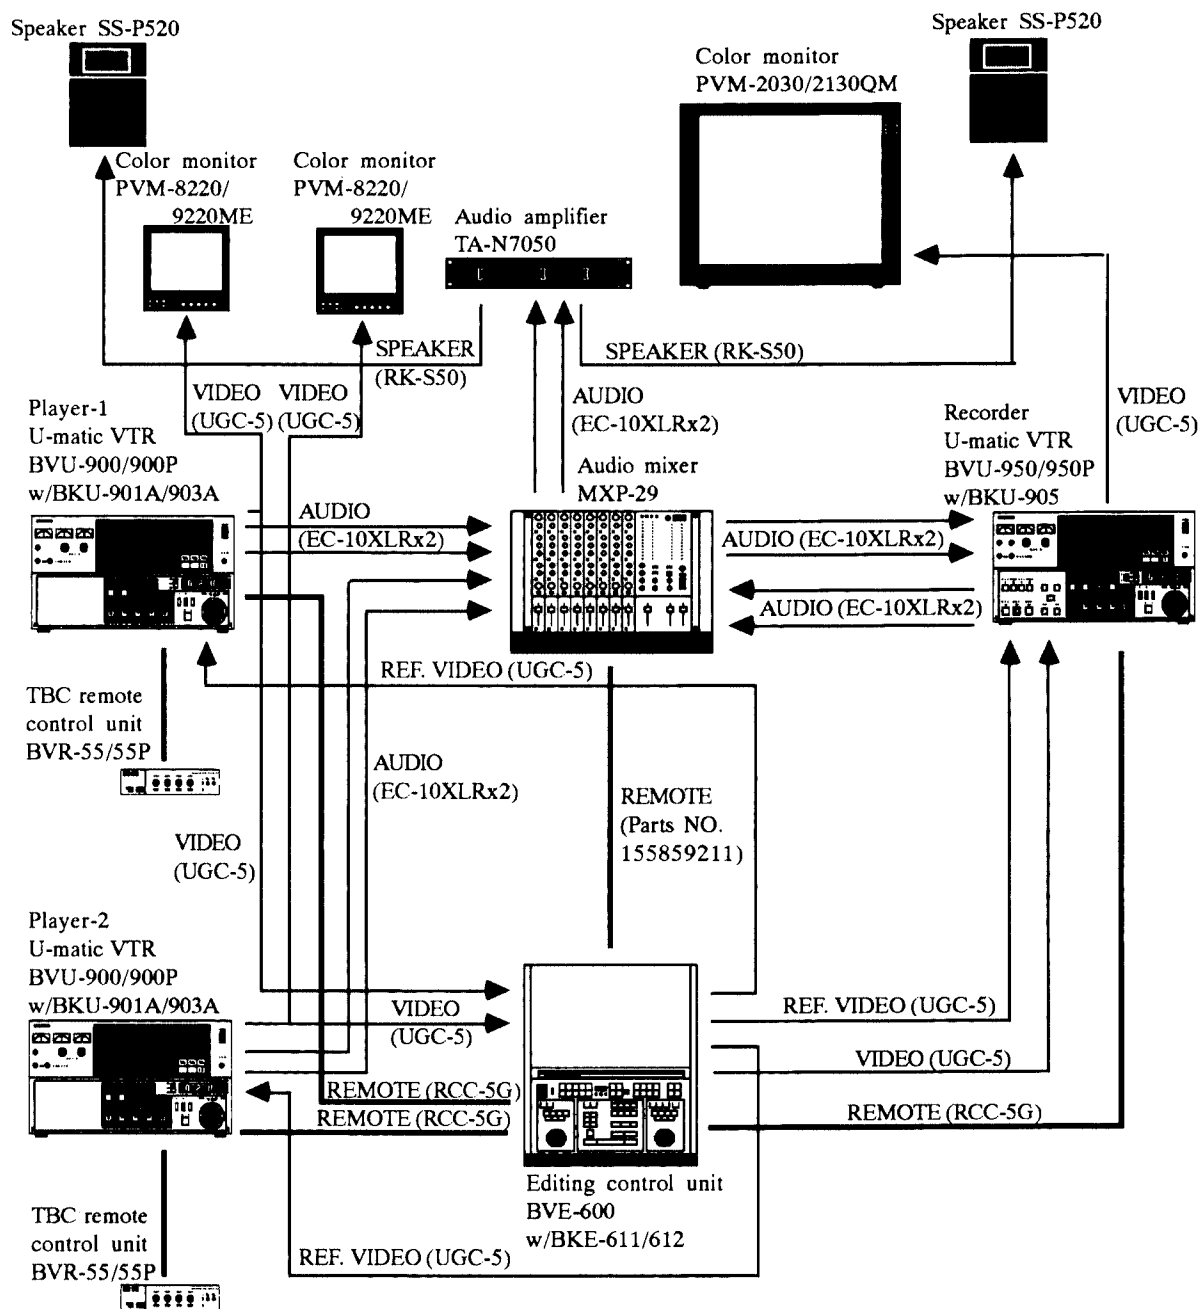

FEATURES

- * The BVE-600 can compose a basic A/B roll editing system.
- * When the optional Plug-in Switcher Board is installed into the BVE-600, dissolve, wipe, and key effects can be performed without external switcher.
- * The MXP-29 Audio Mixer can be controlled from the BVE-600.
- * The combination of the BVU-900, BVU-950 and BVE-600 makes a suitable A/B roll editing system with high picture and sound quality.

DESCRIPTION	MODEL NAME	QUANTITY
1. U-matic Editing VTR (Recorder)	BVU-950/950P	1
2. Time Code Generator/Reader	BKU-905	1
